

EUROPEAN TRIATHLON UNION

ETU EVENT STATUS: 2001 – 2016

1. **INTRODUCTION:** The purpose of this document is to provide details about the status of the past and current ETU Events, including strengths and weaknesses. Recommendations will follow each section to provide an opportunity for further discussion with ITU and at the various levels at ETU. ETU main goals on events are:
 - a) Increase the general participation of triathlon and all related multisport in all age-group categories within Europe;
 - b) Provide opportunities for young athletes to access the sport;
 - c) Keep gender balance on all level of competitions;
 - d) Provide a pathway to grow from youth athlete to elite athletes competing at the Olympic Games.

2. **GENERAL:** A thorough review of the Competition System is required due to:
 - a) the growing number of ITU events in Europe;
 - b) the increased number of participants in all categories;
 - c) the growing demands of Paratriathlon being integrated in the sport;
 - d) the increased number of private international event organising companies wanting to align with our system.

3. **ETU TRIATHLON EUROPEAN CHAMPIONSHIPS:** is the main event of ETU. The event package consist of the following races: elite Olympic Distance Triathlon, the junior Sprint Triathlon event, the Age Group OD and sprint Triathlon, the elite and junior mixed relay, an opening ceremony and the organisation of the ETU Annual General Assembly. ETU is asking to pay an event fee and prize money for both the elite individual event as the elite mixed relay. Having the event live broadcasting is recommended but not mandatory. This means that the LOC has to invest a substantial amount into this organisation. As a return on this investment, the LOCs have been given the majority of the marketing and TV rights. Money usually comes from public funding, sponsorship and entry fees and the percentage depends on the city, country, To find a LOC to organise the event, ETU is opening bids annually.
 - 3.1 *Scheduling:*
 - a) bid process: the bid period for the elite European Championships opens approximately 2 and a half years prior to the event, while the event is assigned 2 years prior to the event date. Regarding the other events (U23, youth) the bid period opens 1 and a half year prior to the event is assigned 1 year prior to the event date.
 - b) event date: the event cannot be in conflict with a WTS and/or WC event. Usually the Championships take place between mid-June and mid-July with the exception of an Olympic year were the event will take place earlier during the year (April/May).

3.2 *Host countries:*

From 2001 to 2016, 12 different countries hosted the ETU Triathlon European Championships. 4 of those countries; Spain, Switzerland, Portugal and Czech Republic hosted the event twice with Portugal and Czech Republic hosted this event in the same city; Lisbon and Karlovy Vary respectively.

3.3 *Participation:*

The ETU Triathlon European Championships events focus on elite athletes for performance excellence and age-group athletes for high participation numbers.

- a) Programme increase by including the following categories/events;
 - U23 (2005)
 - youth relay (2005)
 - paratriathlon (2006)
 - mixed relay for elite and juniors (2009)
 - Age Group sprint (2010)
 - Elite sprint (2016)
 - Youth individual race (2016)
 - Club Championships (2016) (there have been already Triathlon Club European Championships in 1997, 1998 and 1999 in a team trial format for both men and women)
- b) Number of days: Increased from 2 day (2001-2004) to more than 5 days event due to an increased programme. This often resulted in many competitions taking place under less than ideal conditions. Therefore the European Championships have been split up in multiple events:
 - 2005: split in 2:
 - 1. elite-juniors, AG and para
 - 2. U23 and youth relay
 - 2016: split in 5:
 - 1. para, elite OD, juniors, mixed relay
 - 2. Elite sprint
 - 3. U23 individual and relay
 - 4. Youth individual and relay
 - 5. Club championships
- c) Participant Increase: started with around 800 participants, now around 2000, as well as a 2 to 4 additional numbers with support personnel and family members, this generates a significant positive impact for the LOCs and cities. The elite, U23 and junior competitions have a maximum field of 75 athletes, which is filled at the junior men's categories and almost with the U23 and elite men. In the women's categories the field is around 75% full in the juniors category and 60% full at the U23 and elite category. The Youth European Championships are organised in a relay format for both men and women. In each team are 3 athletes. With the exception of 2009 there were always more men teams than women teams on a ratio of 3:2. The European Championships welcomed the first male paratriathletes in 2006 and the first female paratriathletes in 2009.

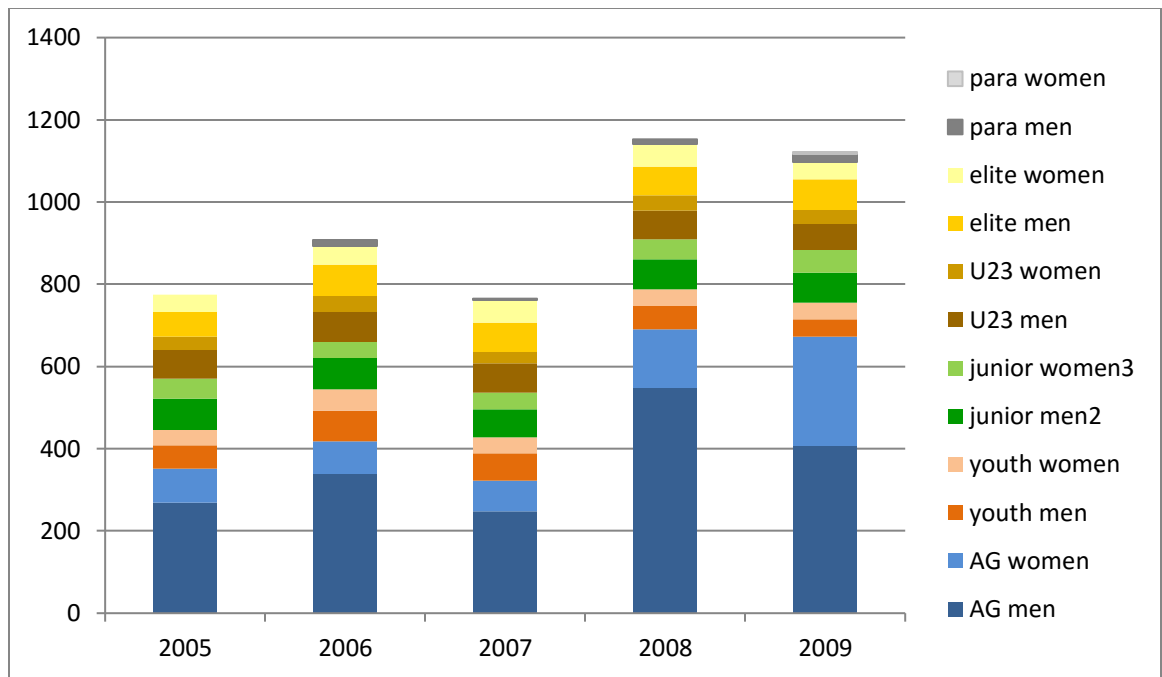

Table 1: participation level Triathlon European Championships all categories 2005-2009

Starting 2010 ETU started not only to organise the Triathlon European Championships for AG in Olympic Distance but as well on Sprint Distance. The last couple of years the sprint is organised on Friday while the OD takes place on Sunday, which makes athletes combining both events. This resulted in an increase of AG participation especially during the last 3 years.

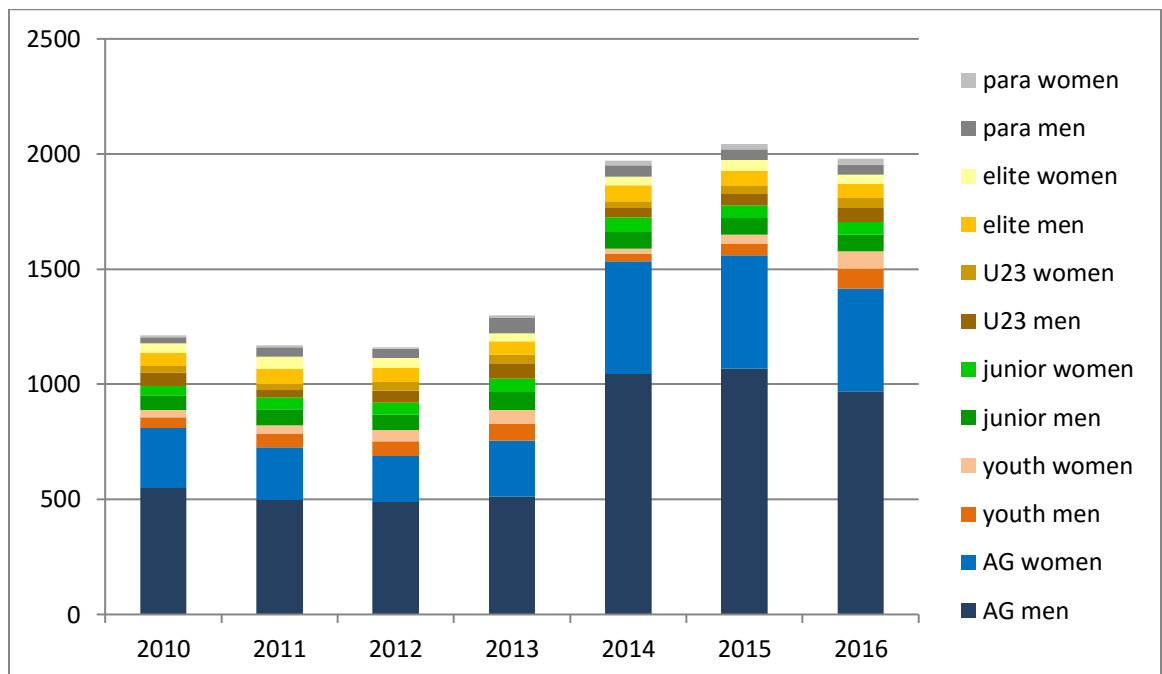

Table 2: participation level Triathlon European Championships all categories 2010-2016

Please note that in 2016 ETU started with an individual European Championships event over a semi-final/final format to give as much as possible Youth athletes the possibility to participate.

After the individual event there was as well a mixed relay event. This resulted in a huge increase of participation in this category.

Also in 2016 ETU started with the Triathlon Club European Championships. This first edition 18 clubs from 10 National Federations participated at a mixed relay format European Championships.

- d) Qualification has been refined: ELITE and ELITE Paratriathlon are based on both ITU and ETU rankings; U23, Juniors and youth are based on quotas from Continental Championships and Age Groups are a fixed quota per country with extra for the Host NF. The number of entries and amount of promotion of the Triathlon European Championships for Age-Group athletes are the sole responsibility of National Federations.

DISCUSSION POINTS:

1. Number of athletes participating in the different categories as well as the maximum number per NF;
2. Increasing the amount of Age Group athletes participating
3. Adding AG Para to the package
4. Package the programme of the European Championships; elite OD and sprint, U23, Juniors, Para, AG sprint, AG OD, mixed relay for elite, U23 and Juniors, Triathlon Club Championships
5. U23: OD or sprint
6. European Cup test event to be conducted before hosting the European Championships

- 4. **ETU EUROPEAN CUP EVENTS:** Since the WTS was established in 2009, the ETU Triathlon European Cup events Cup became a third series with top 20 athletes almost never competing. Over the past 8 years, the ETU European Cup event have had to find a place in the ITU event structure and LOCs and Host NFs have struggled with the reality of lower quality fields and a decrease in popularity amongst all stakeholders.

4.1 Scheduling:

a) bid process: the bid period for the ETU Triathlon European Cups opens approximately 1 and a half years prior to the start of the season while the events are assigned immediately after the European Cup final of the previous year.

b) event dates: ETU is trying while building up the event calendar to have no conflict with another ETU European Cup in the same weekend and also to avoid conflicts with ITU World Cup and WTS Series.

2001-2008: There were 8-17 ETU Cups events each year, in 6 to 13 countries, starting in April and finishing in October.

2009-2016: There were 10 to 15 ETU cups each year, in 7 to 12 countries, starting March and finishing in October.

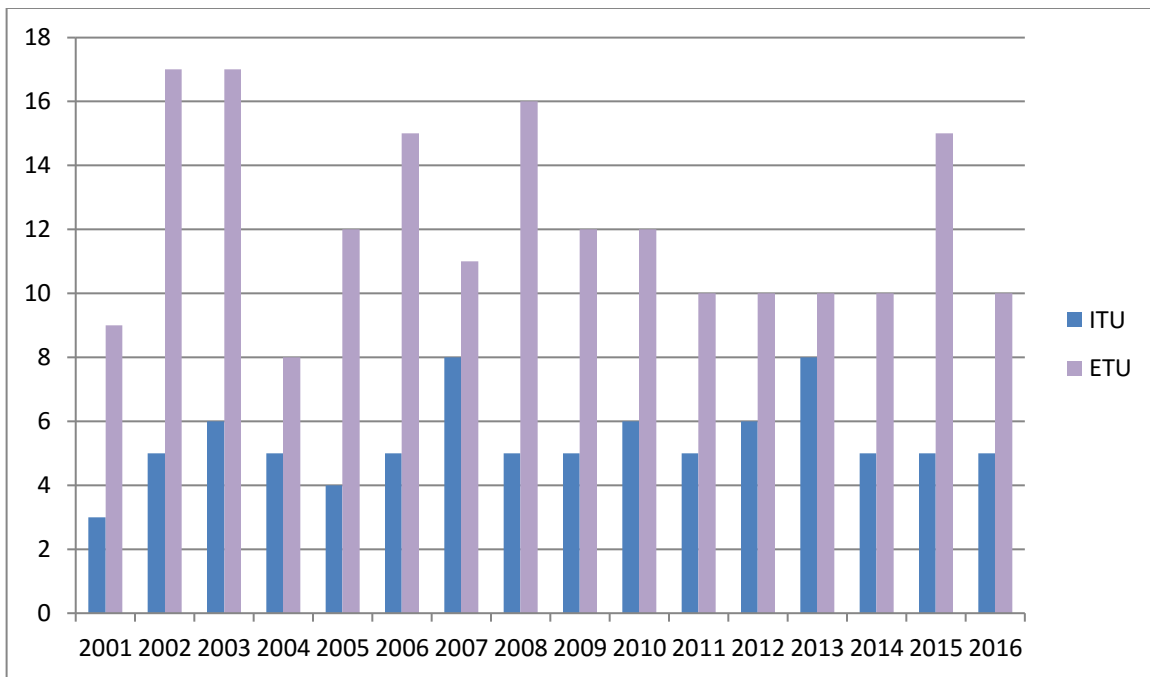

Table 3: Amount of ITU events and ETU events per year 2001-2016

4.2 Host cities/countries:

- a) Host cities: Between 2001 and 2008, 53 different cities hosted European Cup events. Between 2009 and 2016, 40 different cities hosted European Cup events.

On the charts below you can see the cities that hosted more than one European Cup per period.

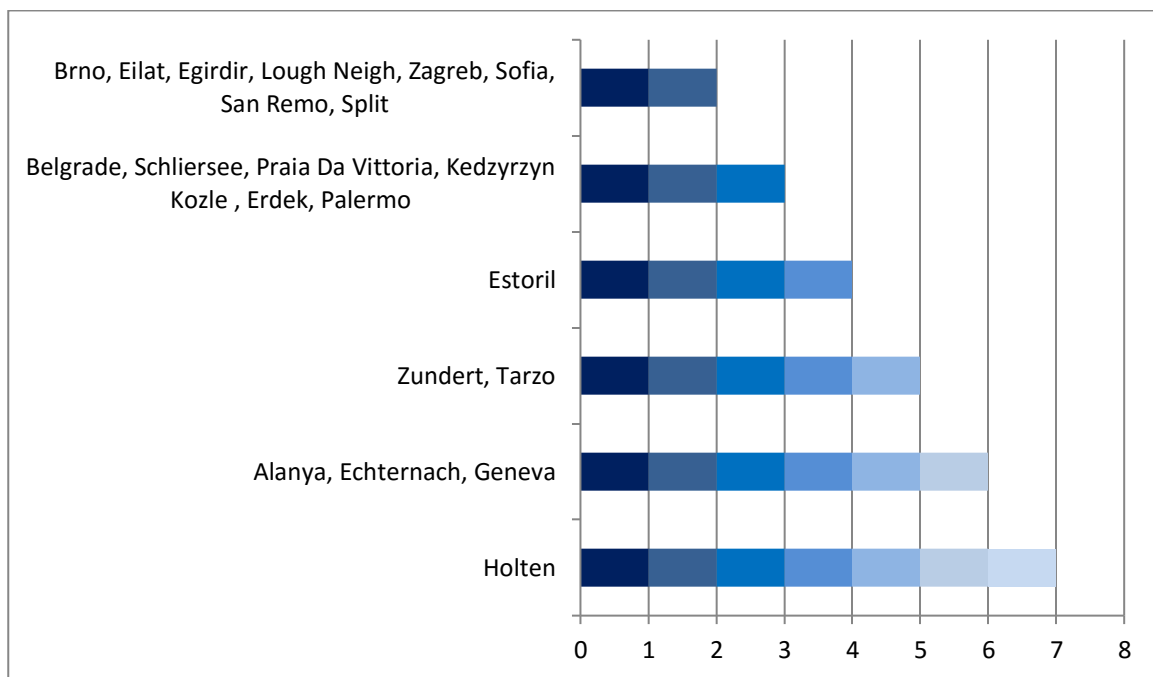

Table 4: Cities organizing more than one ETU European Cup in the period 2001-2008

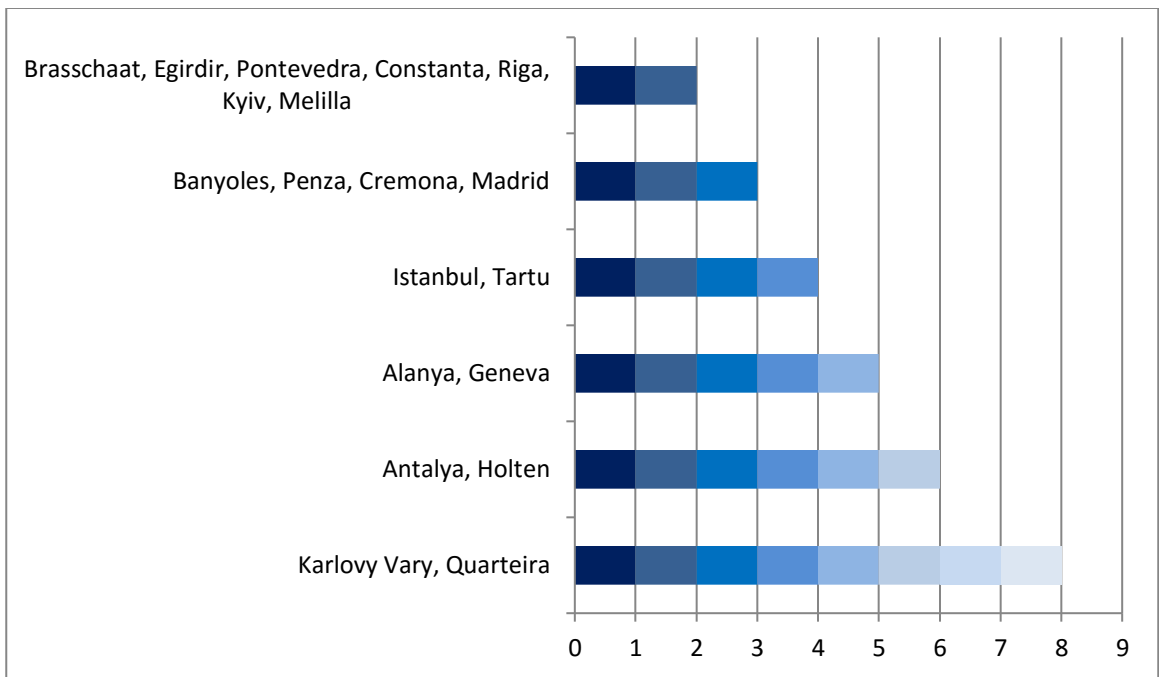

Table 5: Cities organizing more than one ETU European Cup in the period 2009-2016

It should be noted that between 2001 and 2016 Holten (NED) hosted 13 European Cups, Geneva (SUI) and Alanya (TUR) 11, Karlovy Vary (CZE) 9 and Quarteira (POR) 8 European Cups.

b) Host countries:

i) 2001-2008: 25 countries hosted European Cups of which 6 organised more than 1 European Cup in 1 year. Turkey organised in this period the most events (15) followed by the Netherlands (12) and Italy (10). In the chart below all the countries that hosted at least one European Cup in this period.

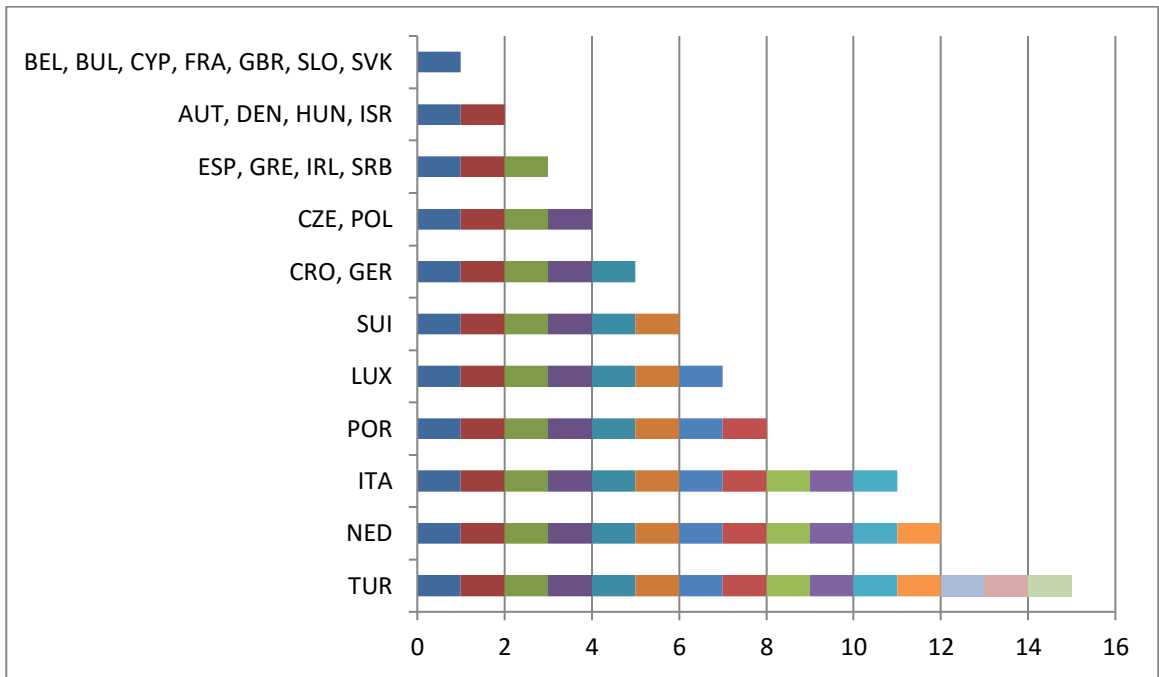

Table 6: countries organising ETU European Cup events between 2001-2008

ii) 2009-2016: 23 countries hosted at least 1 European Cup, while 3 of them organised more than 1 European Cup in 1 year (Turkey, the Netherlands and Spain). It was again Turkey that organised in this period the most events (17) followed by Spain (12), the Netherlands (9) and Portugal and the Czech Republic (8). In the chart below the countries that hosted more than once a European Cup in this period.

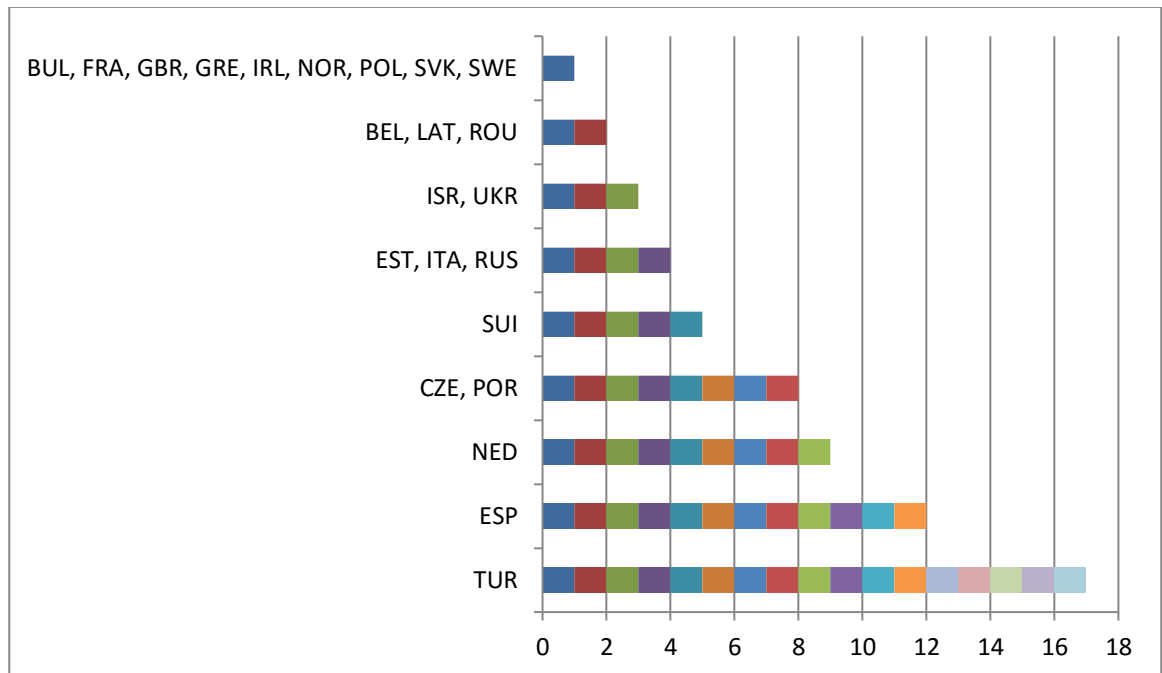

Table 7: countries organising ETU European Cup events between 2009-2016

4.3 *Participation*: European Cup events have a scoring value on the ITU Points List and the European Cup ranking (which gives overall prize money as well). This has ensured good participation from athletes moving up towards the top elite level. Rarely an athlete ranked top 20 in the world is participating.

- a) ETU European Cup events don't seem dependent on large numbers of Age-Group athletes. Some LOC's only stage junior and kids' events in conjunction with the European Cup. The business model is different from ITU sanctioned events due to the reduced costs of the prize money, event fees and no TV costs.
- b) Maximum Elite participation has been set on 75 men and 75 women during the last couple of years which is tight on some of the elite men events, creating elite male athletes remaining on the wait list. On the women's side the quota is not filled, where numbers have dropped as low as 10 athletes.

Please note that in the period 2001-2008 there was no restriction on the amount of participants and the amount of athletes per NF. Therefore on some elite male events there were over 100 athletes. If we correct the figure to maximum 75 participants in the events the figures will look different.

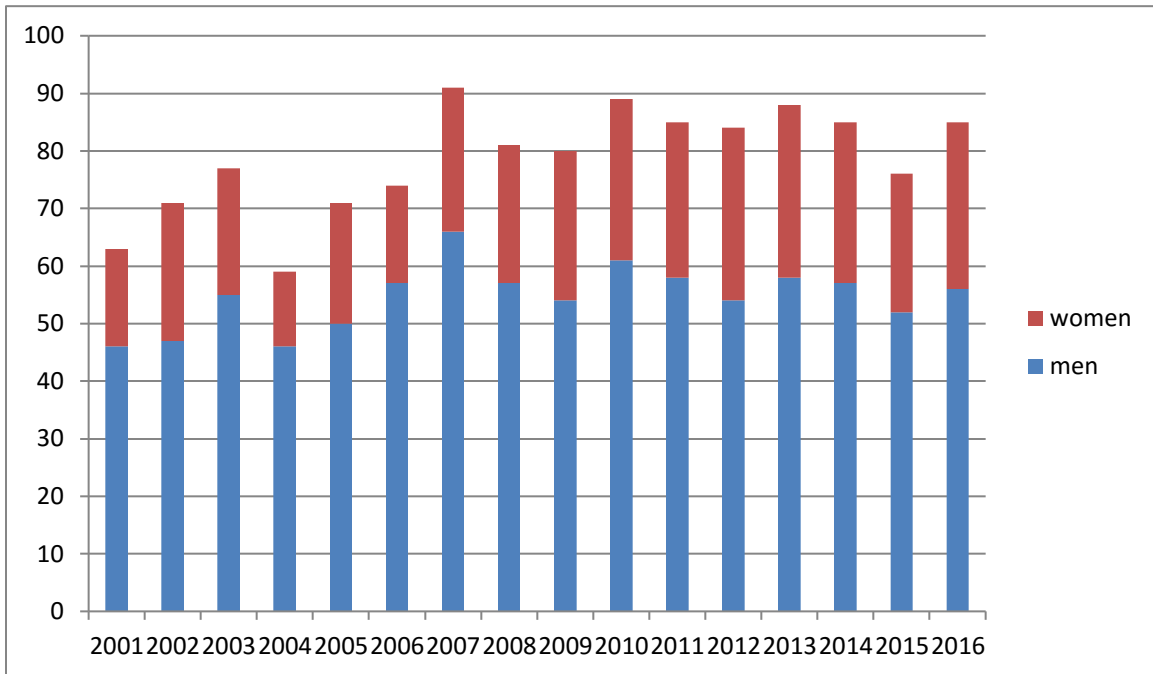

Table 7: Average male (corrected for maximum 75 men) and female participation at ETU European Cup events 2001-2016

As shown in table 7 around 33% of the participants at ETU Triathlon European Championships are women.

Below you can find the average, minimum and maximum elite participation at the ETU European Cups between 2001 and 2008, when the ETU European Cups were the second level of events.

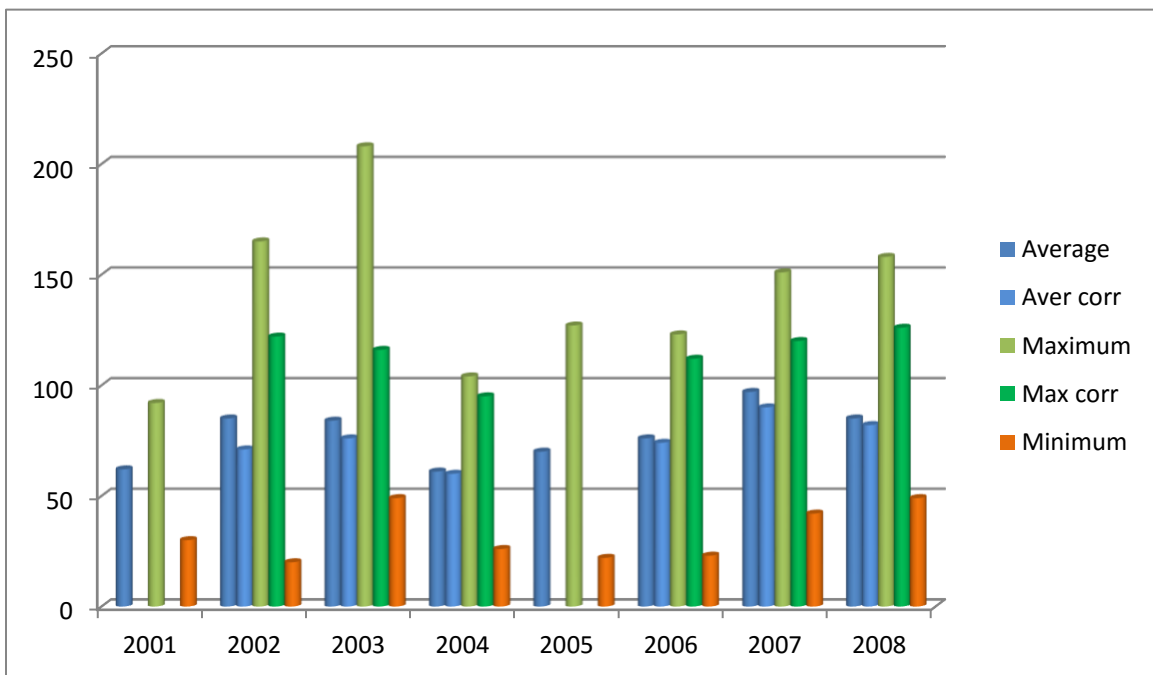

Table 8: Average, minimum and maximum participation elite ETU European Cups 2001-2008

Below the average, minimum and maximum participants in ETU European Cup events from 2009 to 2016.

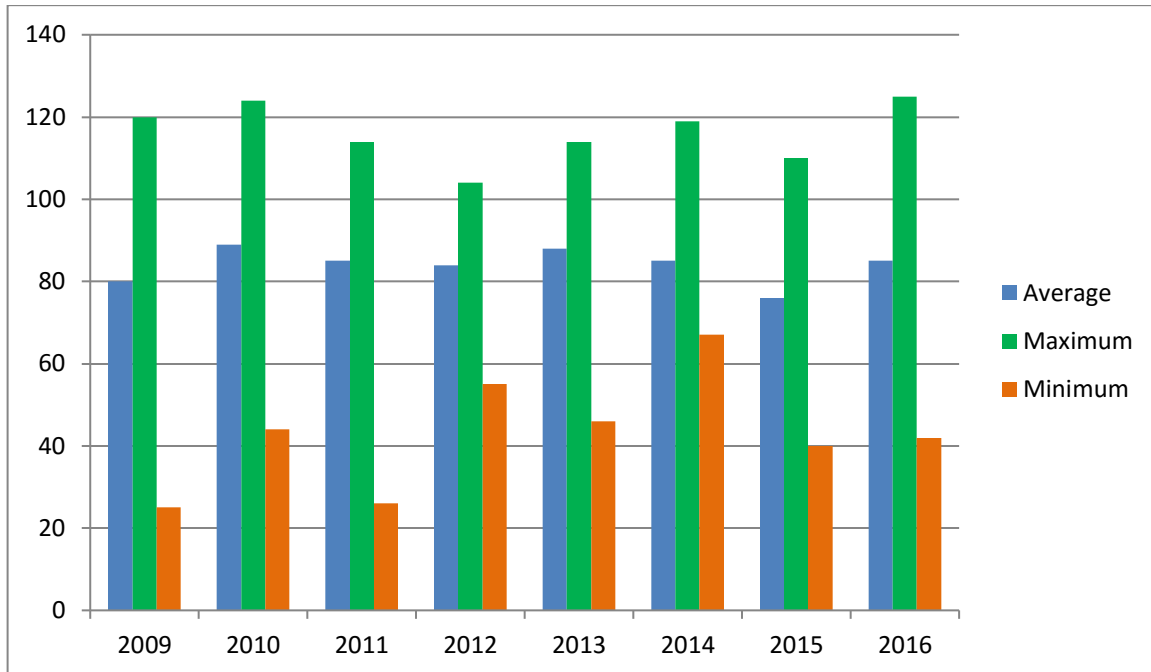

Table 9: Average, minimum and maximum participation elite ETU European Cups 2009-20016

There is huge difference between the event that attracts the most athletes and the one that has a very low participation level. Reasons? Lack of info, visa needed, difficult to travel too, expensive,...?

- 4.4 *Formats:* Till 2010 ETU European Cup events were on Olympic distance only. Since 2011 also sprint events have been integrated. The trend is towards hosting more sprint events, i.e., reduced road closures create more time for Age-Group or kids competitions – see chart below.

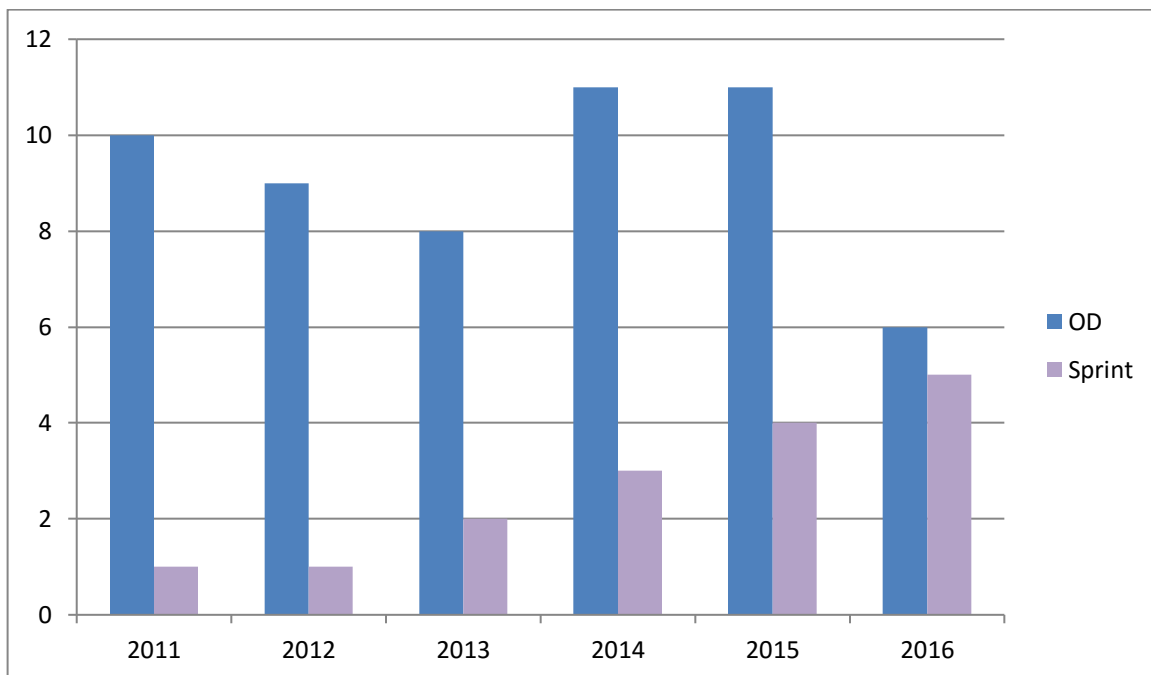

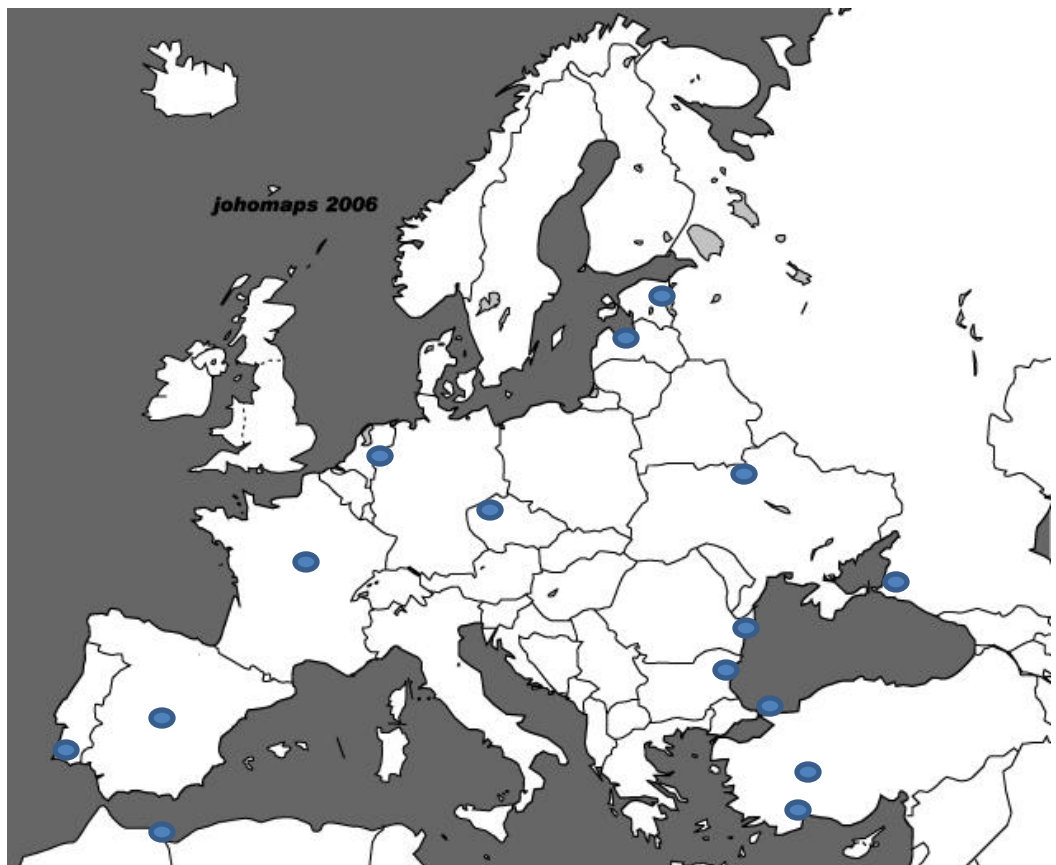

Table 8: ETU European Cup events Olympic Distance versus Sprint Distance 2011-2016

4.5 *Geographical distribution:* To guarantee global accessibility of elite athletes, ETU European Cup events must be well spread over the European continent.

Situation in 2006

Situation in 2015

- 4.6 *Calendar planning:* The ETU European Cup calendar is set after the WTS and WC calendar, therefore ITU should meet the goal of setting the WTS and WC the latest by the end of August. The goal of ETU is having next years' calendar out by October the day after the ETU European Cup Final. ETU is looking for LOCs to organise European Cups on a yearly base. The bid process runs from mid of June till end of September.

DISCUSSION POINTS:

1. Ideal number of ETU Triathlon European Cups;
2. Distribution of European Cups in Europe;
3. Number of elite athletes participating at European Cups as well as the maximum number per NF;
4. ETU European Cups as an integrated part of the development of athletes towards the top level;
5. Ideal Ratio of Sprint and Olympic Distance events;
6. Can the women participation level be increased;
7. is it possible to help some LOCs to reach a higher level of participation;
8. Semi-final/final format as part of the European Cup

5. **ETU TRIATHLON JUNIOR EUROPEAN CUP EVENTS:** In 2006 ETU started with a circuit of races for juniors; the ETU Triathlon Junior European Cup.

Scheduling: Already at the first Junior European Cup race season in 2006, 8 Junior European Cup events were scheduled. Since then between 6 and 13 Junior European Cup events yearly took place. The events take place between March/April and September/October. Since 2014 each NF cannot host more than 1 Junior European Cup. Also in 2006 none of the 8 events were a 'stand-alone' event. All were combined with an elite ITU or ETU event or the U23 Triathlon European Championships. This has changed the following years, however more Junior events are a combined event instead of a stand-alone event. ETU is encouraging NFs to have the event with an ETU or ITU elite event.

a) bid process: the bid period for the ETU Triathlon Junior European Cups opens approximately 1 and a half years prior to the start of the season, while the events are assigned immediately after the European Cup final of the previous year.

b) event dates: ETU is trying by building up the Junior European Cup event calendar to avoid having 2 junior European Cups in the same weekend. Preferable the events take place in conjunction with an elite or U23 event and during school holidays as most of the junior athletes are still at school.

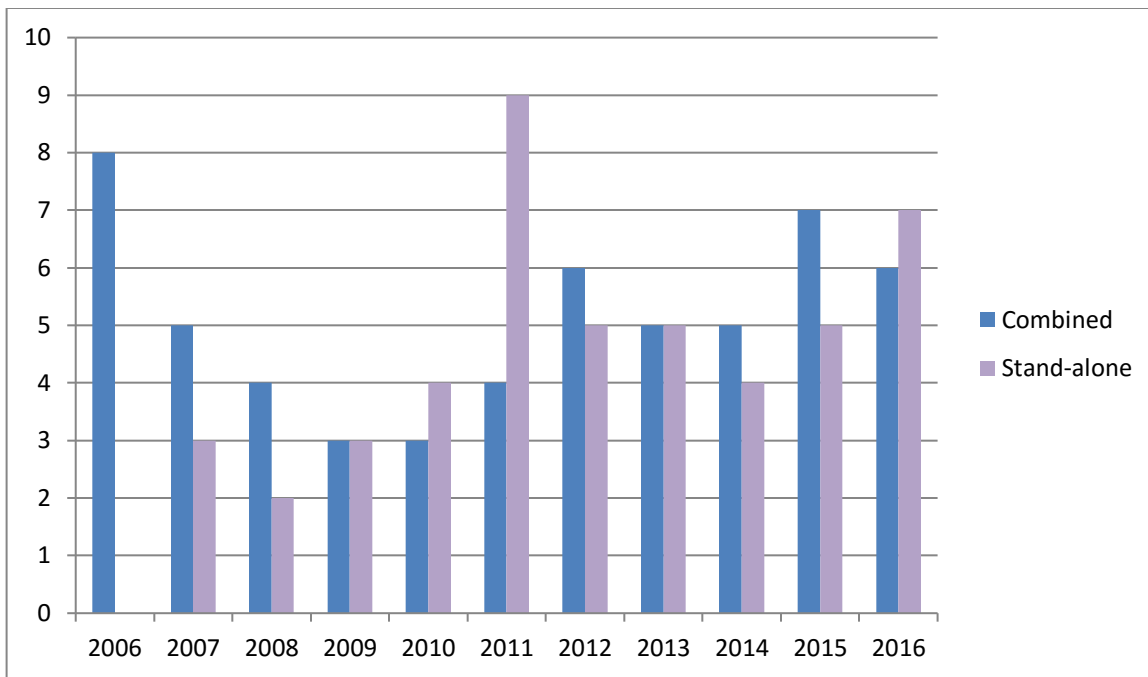

Table 9: Junior European Cups as a 'combined' and 'stand-alone' event

5.1 *Host cities/countries:*

a) Host cities: Since the start of the Junior European Cup Series in 2006, 40 cities organised at least one ETU Triathlon Junior European Cup. 18 cities from 16 NFs, organised more than once a Triathlon Junior European Cup. Record holder is Tiszaujvaros (HUN) that organised non-stop an ETU Junior European Cup always in combination with an ITU World Cup event. Since 2001 the Tiszaujvaros event runs over semi-finals and a final. Also Alanya (TUR), Bled (SLO) and Holten (NED) organised many Junior European Cups.

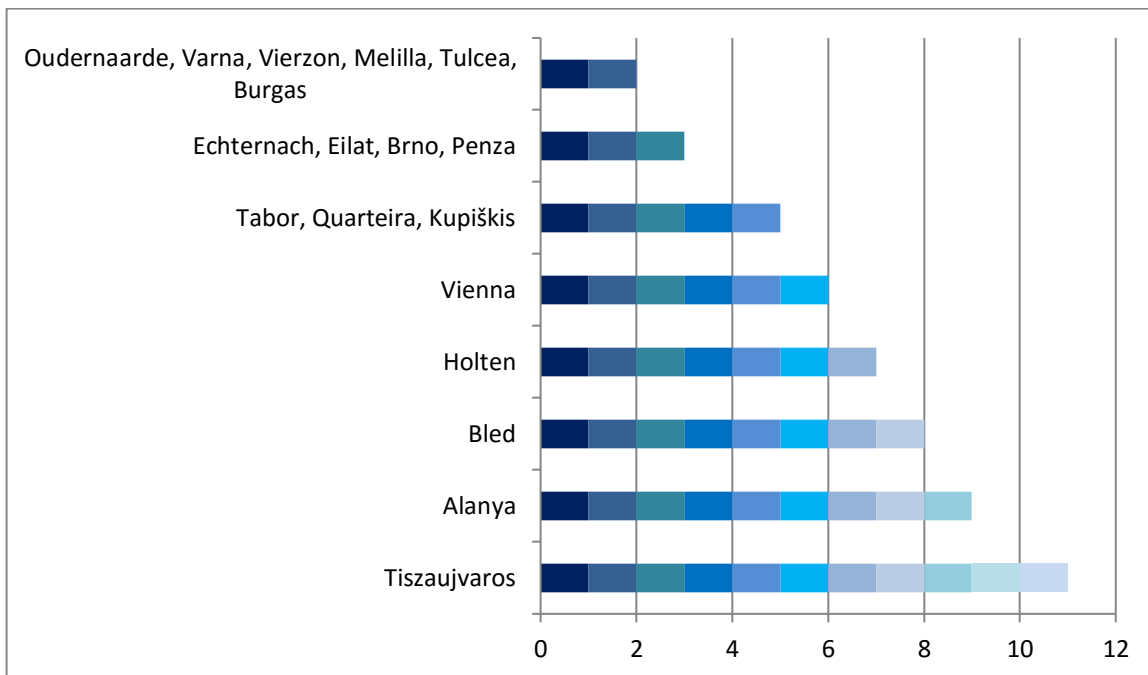

Table 10: Cities organizing more than one ETU Triathlon Junior European Cup in the period 2006-2016

b) Host countries: since 2006 24 countries organised at least 1 ETU Triathlon Junior European Cup. 10 countries organised the event in different cities. It's Turkey that organised the most Junior cups (13), followed by Hungary (11) and Slovenia (9).

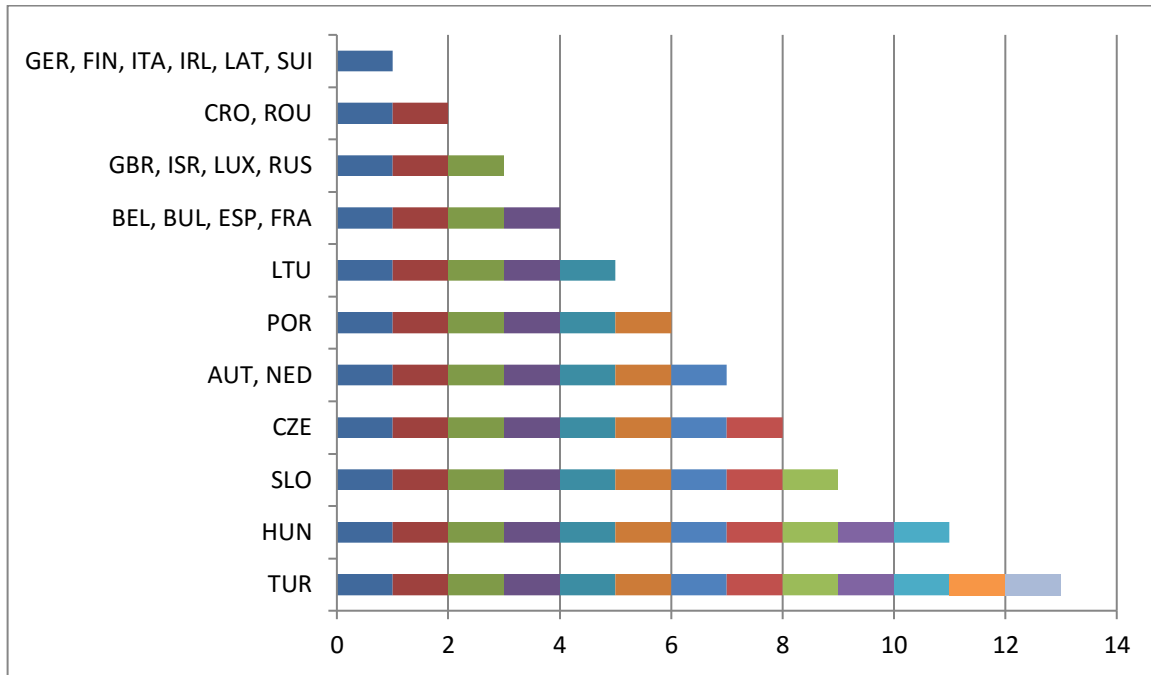

Table 11: countries organising ETU Triathlon Junior European Cup events between 2006-2016

5.2 *Participation:* ETU Triathlon Junior European Cup events have a scoring value on the ETU Junior European Cup ranking and since 2014 there is as well a NF Junior European Cup ranking that gives prize money to the top 3 countries within this ranking. In this ranking the score of the top 2 male and female athlete of the country counts.

- ETU Triathlon Junior European Cup events don't seem dependent on large numbers of Age-Group athletes. The costs to organise such an event is very low as there is no mandatory prize money, doping control and TV costs.
- Maximum Junior participation has been set on 75 men and 75 women (with the exception of the semi-final/final format) which is tight on some of the junior men events, creating junior male athletes remaining on the wait list. On the women's side the quota is not filled, where numbers have dropped under 10 athletes.

Below the average, minimum and maximum participants in ETU Triathlon Junior European Cup events from 2006 to 2016. Even with an increase of the amount of events there is not a lower average level of participants.

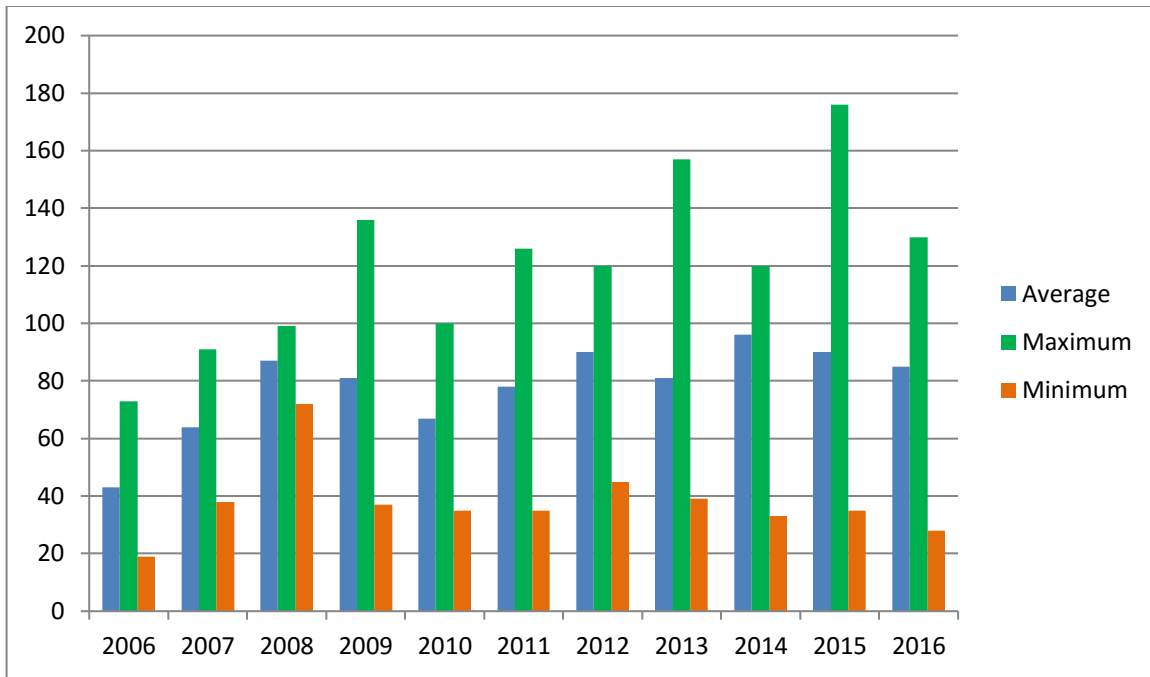

Table 12: average, minimum, maximum participants in ETU Triathlon Junior European Cup events 2006 - 2016

If you compare the average participation on ETU Triathlon Junior European Cups on men versus women participation you can see that about 1/3th of the participants are women, which is similar to the elite category.

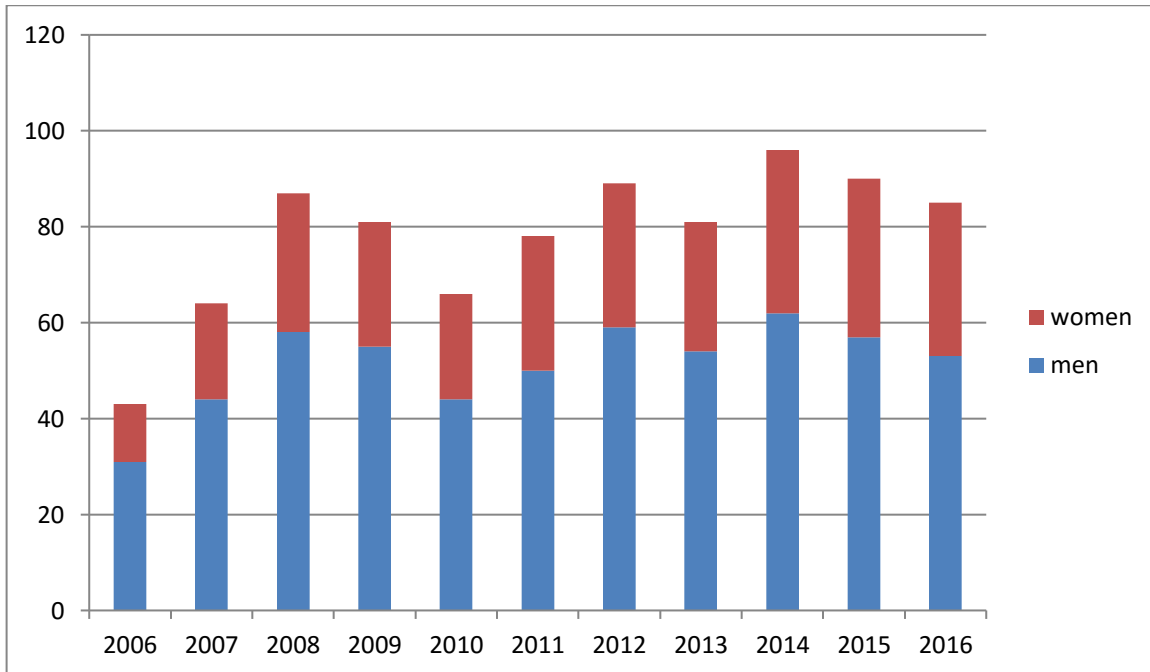

Table 13: Average male and female participation at ETU Triathlon Junior European Cups 2006-2016

5.3 *Geographical distribution:* To guarantee global accessibility of junior athletes, ETU Triathlon Junior European Cup events must be well spread over the European continent. Below the geographic distribution

of the events in 2016. The locations in blue are in conjunction with another event (ETU European Cup, U23 European Championships, ITU World Cup), the orange ones are a stand-alone event. A lot of the events are in central Europe and those look like they are the most popular ones (Tabor, Tiszaujvaros, Bled, Zagreb).

5.4 *Calendar planning:* as Junior athletes are usually still in school the events should be set that there are no events during exam period and most of the events being set in July and August.

DISCUSSION POINTS:

1. Ideal number of Junior European Cup events;
2. Increase female participation;
3. combined versus stand-alone event
4. new formats to increase participation: semi-final/ final, time trial and final
- 5.

6. MULTISPORT EUROPEAN CHAMPIONSHIP EVENTS:

Multisport events got started with long Distance Triathlon an duathlon during the late 80s and has more recently been expanded with Winter Triathlon (1999?), Cross Triathlon (2007), Aquathlon (2011), Duathlon long distance (2012), and cross Duathlon (2015).

6.1 *Scheduling:*

a) bid process: when the multisport events were separate events the bid period was 6 months starting approximately 1 year and a half prior to the events. In 2016 the ETU Executive Board decided to have a multisport Festival containing all Multisport events with the exception of Winter Triathlon. The bid period for the Multisport European Championships Festival opens approximately 2 and a half years prior to the event, while the event is assigned 2 years prior to the event date.

b) event date: the event cannot be in conflict with any ITU Multisport event.

6.2 *Formats*

a) Triathlon: middle and long distance and cross triathlon distances:

Event	Swim	Bike	run	Min age required
Middle Distance	1.9-3 km	80-90 km	20-21km	18
Long Distance	1-4 km	100-200 km	10-42.5 km	18
Cross Standard	1-1.5 km	20-30 km	6-10 km	18
Cross sprint	500 m	10-12 km	3-4 km	16

b) Duathlon: sprint, standard and long distance and cross duathlon distances

Event	Run	Bike	Run	Min age required
Sprint Distance	5 km	20 km	2.5 km	16
Standard Distance	10 km	40km	5 km	18
Long Distance	min 15 km	min 60km	Min 7.5km	18
Cross Standard	6-8 km	20-25 km	3-4km	18
Cross Sprint	3-4 km	10-12 km	1.5-2 km	16

c) Winter Triathlon distances

Event	CC Run	MTB	CC Ski	Min age required
Standard	7-9 km	12-14 km	10-12 km	18
Sprint	3-4 km	5-6 km	5-6 km	16

d) Aquathlon distances

Event	Run	Swim	Run	Min age required
standard	2.5 km	1000 m	2.5 km	16
Cold water	-	1000 m	5 km	16

6.3 *Participation:*

The ETU Multisport European Championships events are focussing on elite athletes for performance excellence and on age-group athletes for high participation numbers.

Overall participation is much lower compared to the Triathlon (Olympic Distance) Events in all categories for both men and women.

Below you can find the figures of elite and AG participation on 5 ETU European Championships organised in 2016 2008: Triathlon Olympic Distance, Triathlon Long Distance, Cross Triathlon, Duathlon Standard Distance and Winter Triathlon. Please note that for the LD Triathlon in 2016 an average of the MD and LD Triathlon participation has been taken as the event in 2008 was only held over the distance of 4km swim, 120km bike and 30km run.

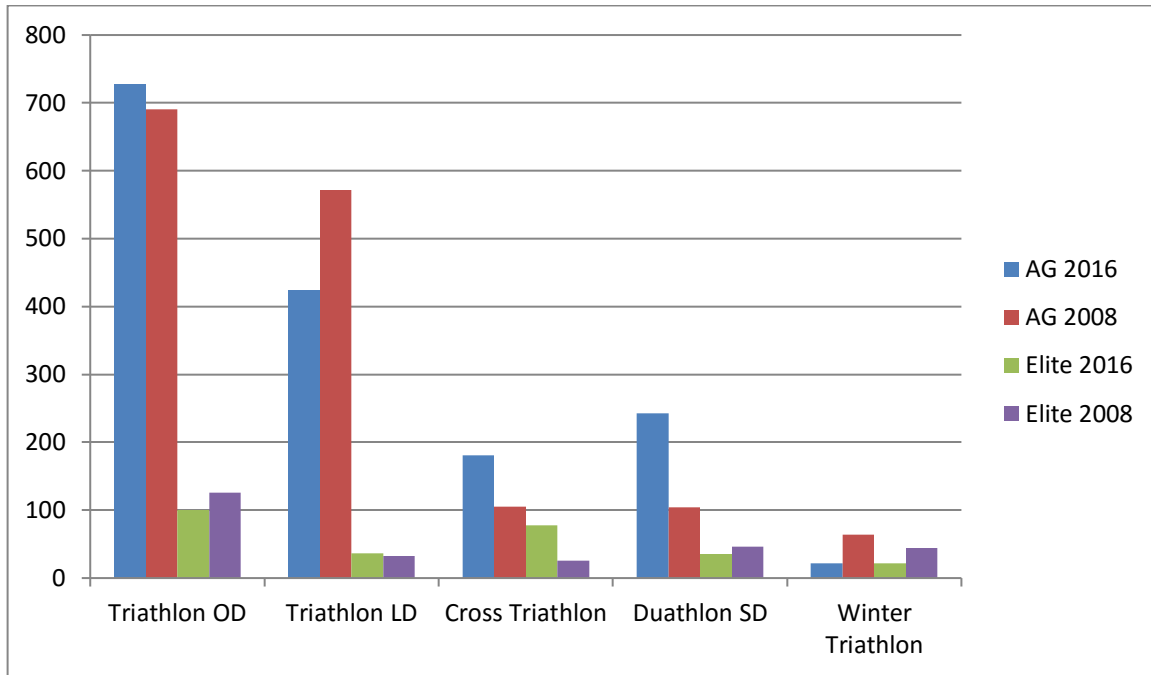

Table 14: AG and elite participation in 2016 and 2008 at 5 ETU European Championships

As you can see in the table above winter triathlon has a decrease in participation on both elite and AG. Cross Triathlon has increased his popularity in 8 years. Is logic as 2008 was for Cross Triathlon the inaugural European Championships. .

AG Duathlon participation has been increased significantly even with the increase of events as since 2014 there is besides a Standard Distance also a Sprint Distance Duathlon event at the same weekend.

There is a small increase of AG participation in OD Triathlon even with the double distances (OD and sprint) being offered for the AG athletes at the same weekend as in duathlon.

Please find below some tables that could help us answering the questions/discussion points that can be found further below.

Question 1: since the cooperation with Challenge in 2012 ETU yearly organises 2 long distance triathlon events: middle and Long Distance. Which of the 2 events attracts the most athletes?

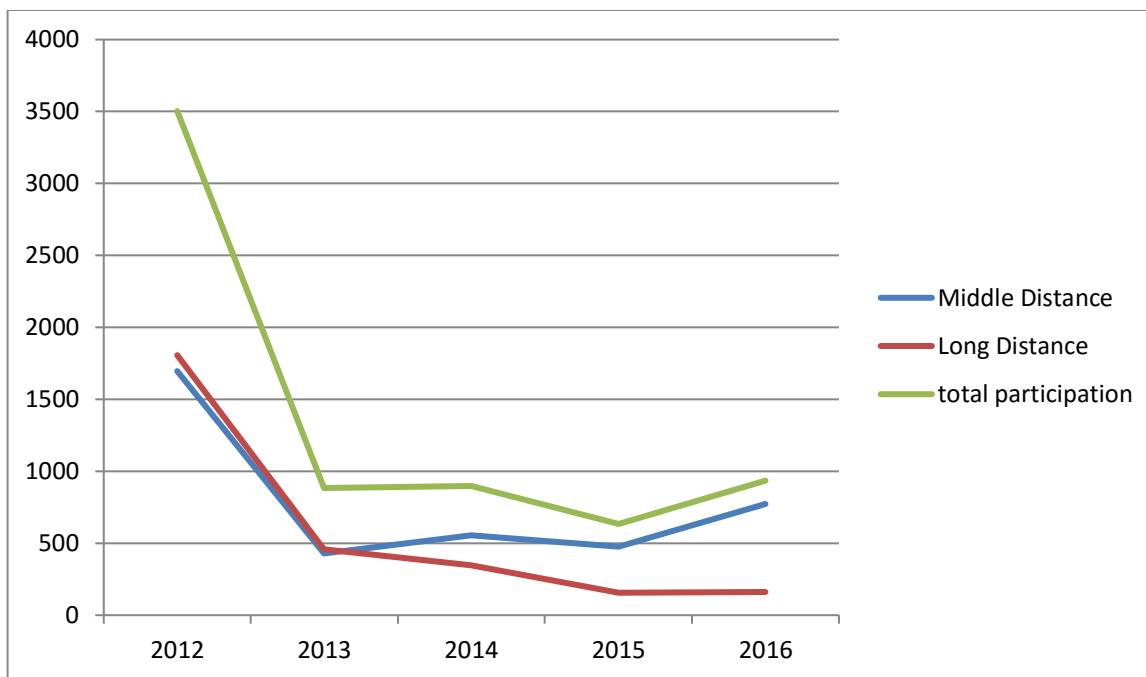

Table 15: Long versus Middle Distance participation from 2012 till 2016

Please note that when ETU started the cooperation with Challenge in 2012 all athletes on the start list were included within the Championships results. Since 2013 only athletes that have been put forward by their National Federation can take part at the European Championships. All other athletes take part in an open race. Looking at the figures the Middle distance participation has increased since 2013 while the Long Distance participation went down. In 2016 ETU welcomed almost 5 times more athletes at the MD than at the LD.

Question 2: For a long period of time Duathlon was only organised as a European Championship over the standard distance. Since 2012 the Long Distance Duathlon has been added and since 2014 also a sprint Distance.

According to the table below the most popular distance is sprint, followed by standard and long distance. Please note that the fact that in 2014 long and sprint were at the same location over one weekend and in 2015 and 2016 sprint and standard were combined over one weekend in one location could influence the figures. Remarkable is that Long distance increased yearly since the launch of the event in 2012.

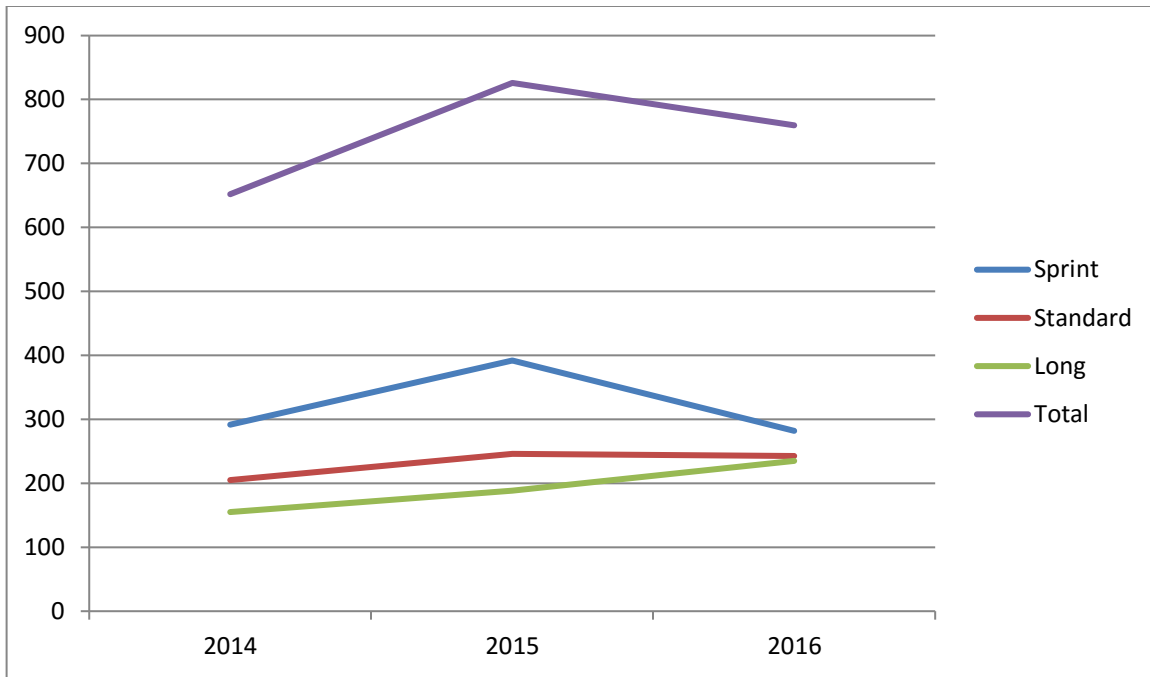

Table 16: AG participants in sprint, standard and long distance duathlon 2014-2016

6.4 Cooperation with Professional Organisers

Since 2012 ETU has a cooperation with Challenge regarding the Middle and Long Distance Triathlon European Championships and with Powerman to organise the Long Distance Duathlon European Championships. The MOU with Powerman has been renewed in 2016 and will last till 2018. The MOU with Challenge will be renewed in 2017 and will contain in 2018 only the Long Distance Triathlon European Championships as the Middle Distance Triathlon event will be part of the Multisport Festival.

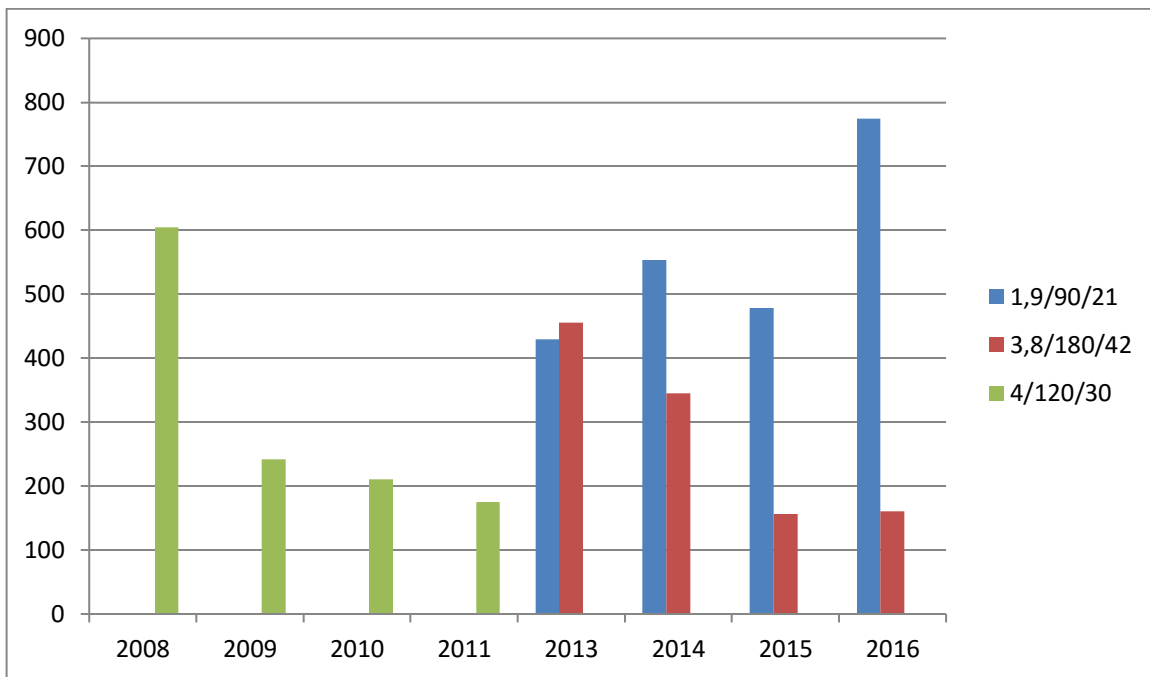

Table 17: comparison of LD participation with and without Challenge as partner

Only in 2008 we had a participation that was similar to a 'Challenge' European Championships. The fact that the event took place in a city, Gerardmer, with a triathlon history could have helped getting that figure. With the exception of 2013 the Middle distance is far more popular than the long distance.

DISCUSSION POINTS:

1. Increase or decrease of the amount of events
2. Duathlon: Standard distance versus Sprint Distance
3. Cooperation with Professional Organisers
4. Increase female participation
- 5.

APPENDIX

Elite European Championships history

TRIATHLON OLYMPIC DISTANCE

1988 Venezia Triathlon European Championships
